

Appendix A

Private Property Infiltration and Inflow Reduction Program

Classification of Work

The following table offers guidelines for classification of work as eligible for District reimbursement or not eligible for District reimbursement. The list is not inclusive or exhaustive and is subject to change.

Work Type	Reference Page Number Per Statement of Policy	Eligible for District Reimbursement	Maybe Eligible for District Reimbursement	Not Eligible for District Reimbursement
Private lateral replacement, repair, or rehabilitation, where replacement or rehabilitation is being performed to reduce private property I/I	6	X		
Public building lateral replacement, repair or rehabilitation as part of a larger private property based project	6		X	
Private property foundation drain disconnections from sanitary	6	X		
Private property sewer main replacement, repair, rehabilitation and related design, planning, investigation	7		X	
Sump pump installation in conjunction with a foundation drain disconnect to direct inflow away from the sanitary including	6	X		
Minor electrical upgrades that are directly related to the installation of a new sump pump for the purpose of I/I reduction	6	X		
Major electrical upgrade such as new panel installation	7			X
Sump pump replacement of existing installation or upsize of existing sump pump	7			X
Separation of combination sumps that have gray water (e.g. laundry wash water and floor drain wastes) and clear water sources directed to them	6	X		
Cleanout and/or floor drain repair/rehabilitation, where performed as part of work to reduce private property I/I	6	X		
Stormwater infrastructure to the extent only necessary to convey the flow removed from the sanitary system through a PPI/I project consistent with the Policy	7		X	
I/I reduction work not related to private property except as noted elsewhere	7			X

Appendix A

Private Property Infiltration and Inflow Reduction Program

Classification of Work

The following table offers guidelines for classification of work as eligible for District reimbursement or not eligible for District reimbursement. The list is not inclusive or exhaustive and is subject to change.

Work Type	Reference Page Number Per Statement of Policy	Eligible for District Reimbursement	<i>Maybe</i> Eligible for District Reimbursement	Not Eligible for District Reimbursement
Investigation and Inspection specifically intended to identify and or quantify PPI/I sources (subject to 20% program cap) <ul style="list-style-type: none"> • Dye testing • Smoke testing • Flow monitoring • House inspections • Televising focused on PPI/I 	6	X		
Staff and consultant time to prepare annual District PPI/I or CMOM reports	7			X
PPI/I information and education (such as website or publication as it directly relates to a project, etc.) efforts	6	X		
Direct in-kind staff time directed toward managing and reporting on PPI/I work (no indirect: i.e. accounting, administrative overhead, etc.)(portions may be subject to 20% program cap)	6	X		
Staff, consultant, or other costs related to developing, promulgating or enforcing ordinances related to I/I not directly related to or leading to specific work reducing PPI/I	7			X
I/I reduction work on the publicly owned main	7			X
I/I reduction work on the public portion of a lateral sewer if work is in conjunction w/ PP I/I efforts	6	X		
Consultant time directly involved in PPII efforts(portions may be subject to 20% program cap)	6	X		
Sewer maintenance work <ul style="list-style-type: none"> • Lateral root control • Lateral blockage removal • Lateral televising not specific to PPI/I identification • Lateral repair for non I/I control purposes 	7			X
New Lateral construction related to development	7			X
Work on oil and grease separators	7			X
Previously completed work	7			X
Ongoing sanitary sewer maintenance work	7			X
Work performed or already required as part of court order	7		X
